There is a custom far away up the river that when a king dies many slaves as well as his wives are massacred, so that they may go with the king to the land of spirits. One end of a rope is securely fastened to a strong, pliable limb of a tree; the other end is pulled down and fastened to the head of the victim, who kneels beneath the tree with hands and feet tied. The executioner then steps forward and with one blow of his hideous knife he severs the head of the victim from the body. The head is sent tossing into the sir. It is picked up and with others boiled and put in pots to decorate the grave of the dead chief.

The history of "Nanco Oldfield," the oneact play presented by Rose Cogman last week,
is worth recording. It was first produced in
London in 1885 by Charles Reade, with Mins E.
Brunton, Mra. Kendal's stater, in the cast. It
was then called "Art." It was an adaptation
from 170mner's "Tridate, ou Comedie et
Tragedie," which has been seen on the Envitan
tage at various times as "An Actress by Daylight," "Comedy and Tragedy" or "The
Tragedy Queen." . . .

The big elephant that plays such an important part in "Wang" at the Broadway Theatre is really worth looking at and will bear close inspection. The writer of this had the opportunity of bearding tais elephant in its own den behind the scenes Saturday night. It took sixteen weeks to build the animal and the mechanism is quite interesting. It is worked by two men, one of whom is particularly strong. When De Wolf dioper sits astride the elephant, the poor inside workers do not edgor the melves, but at other times their labors are not ardrous. When he elephant dios his truck into the large schooner of beer, and the liquid gradually disappears, the audience believes that it has found its way loto the trunk. Not so. A wire in the table that holds the schooner. The beer goes through the table, though there is probably not one in a thousand that would guess this.

SHE KEPT THE CHILDREN QUIET.

A lady, who was very particular about the habits and morals of her children, engaged a nurse who came to her highly recommended, says the Detroit Free Press. The gril proved a perfect success. The children, who were noisy little ones, became quiet and obedient, and their mother marvelled at the change.

One day she noticed them tip-toeing about the house, and cailing the eldest one to her, she asked her why they walked in that manner.

"Nellie told us to so we strong the table to the the saked her why they walked in that manner.

Clement Scott, the well-known dramatic writer of Londou, has been left £12,000, it is said, by a young woman who admired his writings. Is this not comforting? It is a sort of facetative to wrilliance. Come forth, admiring young women, come fortal. Ann if you should leel inclined to emulate the example of Clement Scott's dotting one don't forget—that is to say, remember—

"Nellie told us to, so we won't make any noise."

"But how is it you remember so well what Nellie tells you?"

"We're 'fraid of the trap doors," Hisped a younger child.

"Itush, Sissy! She said we wasn't to tell."

"Tran doors?" said the mother out.

Metropolitan managers say that the first Sat. Metropolitan managers say that the first sat-urdar signt of a production is as important as-the first Monday flight. To be safe on the Monday they get the critics and the well-known "first-nighters," but on the Saturday the theatre is patronized by the habitual the-atre-goers, by the critics of the parlor, if the first Saturday passes off satisfactorily the play is in for a long rus.

When the painter came down next morn ing he thrust his cane through the make shift with the remark, "He that break shift with the remark. "He that breaks pays." None of the class, however, took the hint, and next morning another sheet of paper was pasted across the window. It met with the same fate. And so on the next day, and so on the fourth.

On the fifth day, when the artist came down, there was the paper as before. Fire flashed from his eyes, and roaring, "He that breaks, pays!" he drove his cane through the paper—and through the "He that breaks, pays!" he drove his cane through the paper—and through the pane of g ass behind it that had been put in by the students and then carefully pasted over with a sheet of paper.

"Trap doors?" said the mother, curi, ous to know: "what did Nellie mean?"
The child, being commanded by her mother, reluctantly told.
"She said there was lots and lots of trap doors—that she made them herself, an' if we run an' jumped we'd fall through into a great, deep dungeon, an' nobody wouldn't never find us again."
"So," said the mother, "this is Nellie's method of keeping you quiet! How did she get you to sleep at night?"
"Bears," panted the youngest one; "big bears that are under the bed and will come out an' eat us all up if we don' go to sleep."
"That will do "said the mother."
